Some Safety Tips for Safe Selling:

Some Safety Tips for Safe Buying:

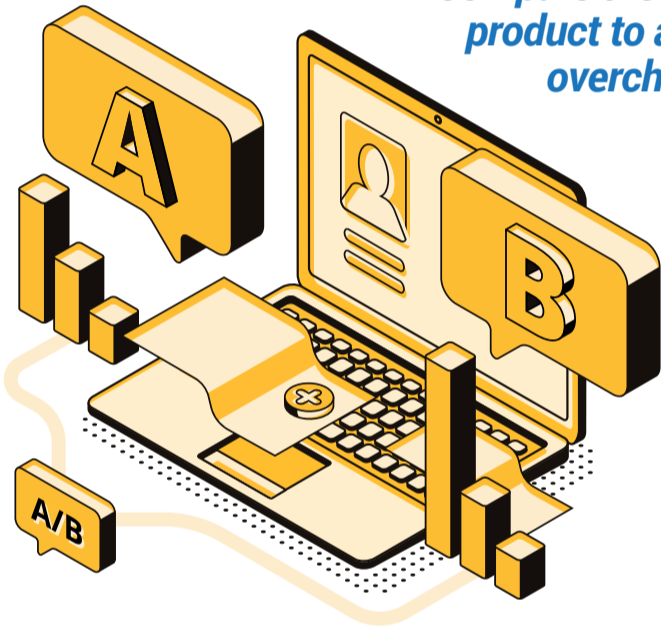

Some offers may be too good to be true. Watch out for such offers. They may be fraudulent.

Make payments only after you have verified the buyer and the products.

Compare the prices of the product to avoid being overcharged.

Test the functioning of the items like electronic goods, cars and vehicles.

Online Safety Tips:

Avoid sharing confidential information like your card details, passwords, usernames etc.

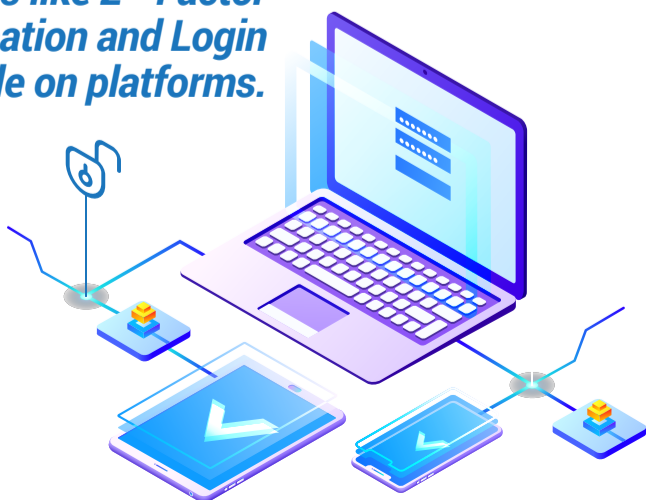

Be cautious while interacting with strangers on social media.

Download only from verified and secure sources like PlayStore and AppStore. Downloading from other sources may lead to your devices being infected by malware.

Use features like 2 - Factor Authentication and Login Alerts available on platforms.

Choose unique, non-guessable and meaningless passwords.
